Passive aggressive to cover internalize shame at her historical inadequacies. Extra sharp passive aggressive external. Self-pitying internal tone.

Flashback/Memory of being unable/unwilling to care for the person that mirrors interaction 2x whatever person spoken to: 1) Nurse grew up in Catholic school never believed he when the needed care was shamed, 2) little boy reminds her of estranged son 3) man immigrant, because of language challenges got scolded but wasn't given time, lost desire to care, didn't want to try.
